TREES SIZE GUIDE 36
Welcome to our new tree buyers guide for the 2018-2019 season

Our new style catalogue has been created and designed to provide your team with information and feature images on our extensive range of ornamental trees, fruit trees and soft fruit available to you for the 2018-19 season. Included is our reserve order form which details our entire range, enabling you to secure your requirements. The document shows cost prices, barcodes and columns for your retail prices. If you require this document electronically please let us know and we will be happy to email it to you.

Our dedicated tree division has developed a reputation for producing exceptional quality trees, specifically selected for the continually changing retail market. Our passionate team are constantly looking to secure innovative products and genetics to complement our range of tried and tested favourites which have been consistent winners for many years.

Look out for the new Malus Frutilicious, a stunning Malus with extraordinary fruit.

This year we are delighted to announce our partnership with J F Schmidt & Son, a global leader in ornamental tree production and breeding:

“For 70 years, J. Frank Schmidt & Son Co. has been ‘Growing New Ideas.’ As originators of the Red Sunset® Maple and introducer or co-introducer of more than 50 other patented or trademarked cultivars, our company is known as a premier source of up-to-date deciduous tree cultivars and new introductions. More than 500 varieties and cultivars of deciduous trees are carefully grown on rich Willamette Valley soils in the heart of Oregon, The Nursery State.”

We are in the early stages of partnership, trialling many of the exclusive and exciting genetics on our nurseries and are looking forward to launching them into the UK in the not too distant future!

Watch out for our regular e-newsletters promoting what’s new and what’s looking good. Get in touch if you would like to be added to our mailing list.

We would like to take this opportunity to thank you for your loyal custom and we look forward to continuing to develop our trading relationship.

Delivery Conditions - Trees
• All tree deliveries are supplied on pallets using a combination of our own and contracted transport
• Minimum quantity 20 trees, maximum 25 trees per pallet
• All orders received by 10.30am on a Wednesday can be delivered the same week in the UK

Soft Fruit
• Delivery is by contract transport on CC plated Danish Trolleys
• 62 units per trolley

Plant Specification

All of our trees are supplied in a 12 litre container with a high quality bespoke picture label.

All our soft fruit plants are produced in 3 litre containers apart from raspberries which are produced in 4 litre containers with 5 canes.
We are happy to pre-price labels for you. If you would like us to do this, please supply us with your retail prices with your annual reserve order or alternatively, with each order you make. All trees are supplied with our own barcodes for your EPOS system, these are shown both on the plant information in the catalogue and also on the reserve order form.

**Ornamental Tree Label**

* All trees are supplied with premium swing tag labels included

* Premium, large bespoke 4 sided label

**Fruit Tree Label**

* Loaded with cultural information

* High quality images to attract the customer’s attention

**Soft Fruit Label**

* All soft fruit are supplied with swing tag labels included

* Premium bespoke double sided labels

* Loaded with cultural information

* High quality images to attract the customer’s attention
Ornamental Trees

With over 40 years of experience at our New Place Nurseries producing high quality ornamental trees for the UK retail market, we feel we have offered a bigger and more improved range for 2019. The varieties have and will continue to be selected to satisfy the requirements of current gardens, with more gardeners looking for trees suitable for small to medium gardens. Look out for the recommendations for trees to plant in small, medium and large gardens at the end of this section.

Primarily produced from budding and grafting, the three-year trees are produced in a 12 litre rigid container.

With advanced husbandry techniques, our trees are produced to a full but compact specification with an overall height of 1.8 - 2.1 metres with side branches retained where appropriate.
## Acacia

**Acacia dealbata**

Gaulois Astier  
5038057003434  8m/4m  
An attractive evergreen tree for sheltered gardens or planting against a south facing wall. Fern-like silvery green leaves complemented by bobbly fragrant yellow flowers in late winter and early spring.

## Acer

**Acer campestre**

The Field Maple - during the autumn the leaves turn shades of gold and red.

**Acer davidii**

Viper (P)  
5038057012863  7m/3m  
Eye-catching green and silvery white striated bark that resembles snake skin which makes for fantastic winter appeal. Before then, the leaves are dark green and turn orange for Autumn.

## Acer platanoides

**Crimson King**  
503805700112  8m/5m  
Leaves are a deep crimson and purple colour. Flowers are yellow with red tinges.

**Crimson Sentry**  
503805700013  6m/2m  
A narrow, columnar tree with reddish-purple leaves. Not as dark as Crimson King and more compact in habit.

**Drummondii**  
5038057000143  6m/4m  
Leaves carry a striking broad marginal creamy-white band.

**Princeton Gold**  
503805700150  8m/5m  
A brilliant, golden leaved form of the adaptable Norway Maple. Resistant to sun scorch.

**Brilliantissimum**  
503805700167  4m/4m  
Leaves open a salmon pink colour, later changing to yellow-green and finally green. 150cm stem.

**Simon Louis Fréres**  
5038057000181  5m/5m  
Young leaves are marked with creamy-white and pink, maturing as pale green with white markings, the underside of the leaf remains green.
Acer Princeton Gold
This Norway Maple shows striking, clear yellow spring and summer foliage. One of the very best for golden yellow leaf colour, it is resistant to sun scorch and very hardy. Yellow clusters of small flowers appear on the bare branches in April, along with helicopter-like seeds later in the year.

8m x 5m in 20 years.
Amelanchier asiatica Ballerina

An award-winning small tree with a broad crown worthy of a place in any sized garden. Produces clusters of star shaped, large white flowers borne in April.

Foliage unfurls a highly attractive bronze colour in spring, before turning dark-green in summer. The oval leaves, which have a fine serration at the edges, are bronze when young turning to a striking reddish-purple colour in autumn for an incredible display. Small red berries are produced which are popular with birds.

4m x 4m in 20 years.
**Acer**

- **Acer rubrum**
  - **October Glory**
  - **5038057000211**
  - **7m/4m**
  - Forms a dense round head, glossy green leaves turn a brilliant tone of red in autumn. Holds onto its leaves until quite late in the season.

- **Acer rubrum**
  - **Summer Red**
  - **5038057010050**
  - **12m/4m**
  - A stunning form of Acer rubrum. The new growth is crimson-red in summer contrasting well with the older green leaves - excellent two tone autumn colours of crimson and yellow.

**Amelanchier**

- **Amelanchier canadensis**
  - **5038057000310**
  - **5m/3m**
  - Small, upright grower. Profusion of star-shaped white flowers in spring. Vibrant autumn colours.

**Amelanchier asiatica**

- **Ballerina**
  - **5038057000297**
  - **4m/4m**
  - An award-winning small tree with a broad crown worthy of a place in any sized garden. Produces clusters of star shaped, large white flowers borne in April. Foliage unfurls a highly attractive bronze colour in spring, before turning dark-green in summer. The oval leaves, which have a fine serration at the edges, are bronze when young turning to a striking reddish-purple colour in autumn for an incredible display. Small red berries are produced which are popular with birds.

**Arbutus**

- **Arbutus unedo**
  - **5038057005230**
  - **5m/4m**
  - Small evergreen tree with attractive brown bark. Small white flowers and red strawberry-like fruit in autumn. Suitable for coastal planting and tolerant of chalky soils.

**Betula**

- **Betula albosinensis**
  - **Fascination**
  - **5038057010913**
  - **8m/4m**
  - Chinese red barked Birch - this selection has copper-orange bark which peels away to reveal layers of cream and creamy-pink coloured bark which turns white with age. Graceful, medium sized tree.

- **Betula pendula**
  - **Dalecarlica**
  - **5038057000389**
  - **7m/3m**
  - Slender tree, drooping branches of delicate and deeply cut leaves.

### Ornamental Trees

#### Euonymus

- **Euonymus niphophila**
  - A broad spreading tree with large leathery grey-green leaves and beautiful patterned bark. Evergreen.
  - **5038057001904**
  - **12m/6m**

- **Euonymus europaeus**
  - A selected form of the common Spindle with green stems and arching branches. Rosy-red fruits are formed during summer and the leaves turn a rich scarlet colour during autumn.
  - **5038057004851**
  - **4m/2.5m**

- **Euonymus**
  - **5038057004851**
  - **4m/2.5m**

#### Exochorda

- **Exochorda serratifolia**
  - Small tree with pure white flowers which are formed in abundance in early spring. Ideal for the small garden.
  - **5038057003144**
  - **4m/3m**

- **Exochorda**
  - **5038057003144**
  - **4m/3m**

#### Fagus

- **Fagus sylvatica**
  - **5038057000679**
  - **12m/8m**

- **Fagus sylvatica**
  - Magnificent specimen tree. The leaves open as light red then deepen to a dark purple.
  - **5038057000686**
  - **10m/6m**

#### Ginkgo

- **Ginkgo biloba**
  - Dating back 270 million years and surprisingly a conifer tree! The unusual fan shaped foliage is light green, turning bright, clear yellow in the autumn. The leaves are often split in the centre into two lobes.
  - **5038057000709**
  - **10m/4m**

- **Ginkgo**
  - **5038057000709**
  - **10m/4m**

#### Gleditsia

- **Gleditsia triacanthos**
  - A striking medium sized tree which has thornless stems and bright golden-yellow young leaves that contrast well with the older dark green foliage.
  - **5038057000730**
  - **5m/3m**

- **Gleditsia**
  - **5038057000730**
  - **5m/3m**

#### Hoheria

- **Hoheria sexstylosa**
  - Bred by the late Graham Hutchins. Will thrive in the south and even further north if given a sheltered position against a wall. Neat pyramid shape habit and masses of single white cherry-like flowers in June.
  - **5038057010517**
  - **4m/2m**

- **Hoheria**
  - **5038057010517**
  - **4m/2m**

#### Ilex

- **Ilex altaclarensis**
  - A large spreading evergreen shrub or small tree with leaves which are green with a yellow margin. Female clone producing red berries in winter. Suitable for planting in sun or shade in most soils.
  - **5038057005346**
  - **4m/3m**

- **Ilex**
  - **5038057005346**
  - **4m/3m**
## Ilex

**Ilex aquifolium**
- **Argentea Marginata**
  - Height/Spread: 8m/7m
  - Barcode: 5038057000747
  - A large spreading evergreen shrub or small tree with white margined leaves flushed pink on young growth. Female clone producing red berries in winter. Suitable for planting in sun or shade in most soils.

**Ilex aquifolium**
- **J.C. van Tol**
  - Height/Spread: 10m/6m
  - Barcode: 5038057004288
  - A large spreading evergreen shrub or small tree with dark, shiny, almost spineless green leaves and large crop of red berries in winter. A self-fertile clone. Suitable for planting in sun or shade.

**Ilex aquifolium**
- **Madame Briot**
  - Height/Spread: 12m/8m
  - Barcode: 5038057012887
  - A purple stemmed form with green leaves, margined dark yellow with spines all along the edge. Small white flowers followed by bright red berries. A female form. Evergreen.

## Juglans

**Juglans regia**
- **Common Walnut**
  - Height/Spread: 8m/7m
  - Barcode: 5038057000747
  - Slow growing but eventually a large tree. Attractive aromatic foliage. Yellowish-green catkins in late spring. Edible creamy-white nuts enclosed in smooth shells in autumn.

## Liquidambar

**Liquidambar styra.**
- **This is a sterile clone with reliable autumn colour. The mid green leaves turn a rich black to crimson-red colour. Unlike other cultivars, the bark remains fairly smooth.**
- **Lane Roberts**
  - Height/Spread: 10m/6m
  - Barcode: 5038057004288
  - Longer and more narrow leaf lobes than the species. Rich autumn tints in shades of orange and red.

**Liquidambar styra.**
- **Worplesdon**
  - Height/Spread: 10m/6m
  - Barcode: 5038057000808
  - A large spreading evergreen shrub or small tree with white margined leaves flushed pink on young growth. Female clone producing red berries in winter. Suitable for planting in sun or shade in most soils.

## Magnolia

**Magnolia**
- **Magnolia**
  - **Lightly scented tulip-shaped flowers in late spring. The flowers start as a blackish-red bud and open to display a rich maroon colour. They are frequently followed by a second round of flower in mid summer.**
  - **Genie (P)**
    - Height/Spread: 4m/1.5m
    - Barcode: 5038057012917
    - A vigorous small tree with dark foliage. Cup-shaped flowers can reach 10cm in length, with nine rosy-pink tepals, soon fading to pale pink with a magenta central stripe on the outside.

**Magnolia**
- **Heaven Scent**
  - Height/Spread: 12m/8m
  - Barcode: 5038057013266
  - A large spreading evergreen shrub or small tree with dark foliage. Cup-shaped flowers can reach 10cm in length, with nine rosy-pink tepals, soon fading to pale pink with a magenta central stripe on the outside.
Liquidambar styra. Worplesdon
A stunning sweet gum variety with leaves that are longer and have narrow lobes, turning an amazing shade of deep orange and yellow in Autumn. It will also bear fruit in the UK.

10m x 6m in 20 years.
**Magnolia**

- **Star Wars**
  - 5038057012924
  - 4m/3m
  - Prized for its tremendous flowers which appear in March and often display until May. The huge, satiny, tulip-shaped, pale pink blooms are flushed with a shade of deep pink. Large, glossy green foliage.

- **Yellow Bird**
  - 5038057012931
  - 10m/6m
  - In our opinion the best lemon yellow flower colour of all the new yellow hybrid Magnolias. The flowers, although not the largest, have a neat goblet shape and bloom in late spring just as the leaves emerge.

- **Crimson Cascade (P)**
  - MM106 5038057012948
  - 3m/2m
  - An arching, weeping habit and purplish foliage in spring, accompanied by crimson flowers. Bronze-green foliage and reddish-purple fruits in late summer to autumn. Ideal for small gardens.

- **Free flowering with large soft pink to white flowers in April and May. Small red partially lobed leaves and yellow fruits which last into winter months.**

- **Golden Hornet (P)**
  - MM106 5038057000853
  - 3m/2m
  - Small tree with white flowers which are followed by large crop of bright yellow fruits that are retained late into winter. This is one of the best crab apples for general planting.

**Malus**

- **Direktoer Moerland**
  - MM106 5038057000822
  - 12m/8m
  - A disease resistant variety, very similar to Profusion but slightly more vigorous. Good autumn colour.

- **Evereste**
  - MM106 5038057000839
  - 5m/4m
  - Distinctive upright habit. Young foliage is silvery white in spring, adopting a lush green colour in summer before developing its stunning intense orange, yellow, red and purple autumn colours.

- **Fruitilicious**
  - MM106 5038057012955
  - 5m/4m
  - A improved form of Malus robusta selected from stock on our own nursery. Bright, large white flowers in May are followed by the largest deep orange crab apples produced by a Malus variety.
Malus x robusta Fruitilicious
A truly outstanding introduction from an unknown source by New Place Nurseries. Originating in Norfolk, this small to medium sized tree has large, single white flowers tinged pink that open in late April or early May. These are followed in September by clusters of huge deep red oval-shaped fruit which persist well into December before the birds can resist them no longer! Excellent for making crab apple jelly and attracting both bees and birds to gardens.

5m x 4m in 20 years.
Malus

**Gorgeous**

- **Root Stock**: MM106
- **Barcode**: 5038057012955
- **Height/Spread**: 5m/4m

Large, narrow white flowers with a star shaped appearance that burst open from pink buds in spring. The flowers are followed by glossy, red-orange crab apple fruits produced in abundance in autumn.

**Harry Baker**

- **Root Stock**: MM106
- **Barcode**: 5038057007623
- **Height/Spread**: 5m/3m

Very large, deep pink flowers with dark green-maroon leaves followed by large ruby red fruit with pink flesh, borne on the tree well into October. Great variety for crab apple jelly.

**John Downie**

- **Root Stock**: MM106
- **Barcode**: 503805700860
- **Height/Spread**: 5m/3m

Small tree with white flowers which are followed by large conical bright orange and red fruits with a refreshing flavour. This is one of the most popular varieties for crab apple jelly.

**Neville Copeman**

- **Root Stock**: MM106
- **Barcode**: 503805700877
- **Height/Spread**: 5m/4m

Small tree with green leaves that are tinted purple in summer. The flowers are light purple in colour and are followed by a mass of large conical orange-red fruits.

**Pink Glow**

- **Root Stock**: MM106
- **Barcode**: 5038057003878
- **Height/Spread**: 5m/4m

Small tree with white flowers which are followed by large, bright pink, plum-like fruits.

**Prairie Fire**

- **Root Stock**: MM106
- **Barcode**: 5038057012979
- **Height/Spread**: 5m/6m

New to the range for this year. A lovely, small, upright tree with vibrant pink single flowers. Shiny, dark purple-green narrow leaves with small purple fruit in autumn.

**Profusion**

- **Root Stock**: MM106
- **Barcode**: 503805700891
- **Height/Spread**: 5m/4m

Coppery young foliage which is followed by a profusion of wine-red flowers and small deep red fruits.

**Red Jade**

- **Root Stock**: MM106
- **Barcode**: 503805700907
- **Height/Spread**: 3m/3m

A small tree with a weeping habit. Young leaves are bright green in colour. The flowers are white and pink, followed by small red fruits which last late into the season.

**Red Sentinel**

- **Root Stock**: 503805700914
- **Barcode**: 5038057000000
- **Height/Spread**: 5m/4m

Medium sized tree. Single white flowers appear in spring. The large clusters of deep red fruits remain throughout the winter, making this variety one of the best for fruiting.
Malus Wedding Bouquet
A beautiful variety with long, pointed, dark green leaves and an abundance of shell-shaped ivory flowers in May. One of the best flowering Malus varieties. Clusters of small, dark red fruits stay on the tree into the winter.

4m x 3m in 20 years.

**Parrotia**

*Parrotia persica*

- A large shrub or small tree with wide-spreading habit and grey flaking bark. The large, green, oval leaves turn crimson and gold in autumn. Delicate, almost inconspicuous crimson flowers in late winter.

**Photinia**

*Photinia x fraseri*

- Variegated young shoots with pink and rosy-red markings. Leaves mature to green, cream and purple-pink variegation. Provides all year round interest - more compact growing than Pink Marble.

**Prunus**

*Prunus avium*

- Spreading habit. Masses of drooping, double white flowers in mid to late spring. Good autumn colour.

*Prunus cerasifera*

- Very dark purple leaves and stems with pale pink flowers in March and April.

*Prunus dulcis*

- The Common Almond. A small tree with lanceolate pointed leaves. Large pink flowers produced during March. Can be susceptible to leaf curl.

*Prunus incisa*

- A pure white profuse flowering Fuji Cherry tree. A lovely delicate, dense and shrubby tree, perfect for small gardens. Pale pink in bud. Bright red flower anthers stand out against white petals.

*Prunus kurilensis*

- A compact, upright, large shrub or small tree suitable for patio growing. Bright, showy white flowers produce a stunning display in early April.
Prunus

Prunus lusitanica

Myrtifolia

5038057004370 1.5/1.5m

Smaller, slender leaves that the species form, with a neat, conical, upright growing habit.

The Portugal Laurel. A small to medium sized evergreen tree with ovate, dark green leaves which have reddish petioles. Scented small white flowers formed in long slender racemes in June and July.

Prunus serrula

5038057001263 5m/4m

Smooth reddish-brown bark that peels away to leave rich colour beneath. Small white flowers.

Prunus subhirtella

Autumnalis

Colt 5038057001317 4m/4m

A small tree with semi-double white flowers from November to March on the bare branches.

Prunus subhirtella

Autumnalis Rosea

Colt 5038057001324 4m/4m

A small tree with semi-double, pale pink flowers from November to March on the bare branches.

Prunus x blireana

Myro/St J 5038057001089 5m/3m

Rich coppery-purple leaf colour holds over the summer with double, slightly fragrant, rose-pink flowers.

Prunus x hillieri

Spire

Colt 5038057001157 10m/7m

Excellent small tree. Leaves with rich autumn tint and soft pink single flowers.

Prunus x yedoensis

Shidare-yoshino

Colt 5038057001393 4m/3m

Weeping habit. Almond scented, single blush-white flowers.

- A small tree with pendulous branches, very attractive when covered with the clear, deep pink, double flowers. The young leaves are bronze-green turning to glossy green.

- As Kiku-shidare Sakura with 150cm stem top worked.

- Reddish-bronze young leaves with rich, deep pink flowers and brilliant orange leaves throughout autumn.
Prunus Jacqueline
A relatively new flowering cherry introduction which features stunning pink blossoms in April and outstanding autumn colours. With its upright, graceful habit it will be a feature in any medium to large garden.

6m x 4m in 20 years.
Ornamental Trees

Prunus

Okame
Colt 5038057001218 4m/4m
Excellent small tree. Masses of carmine-rose flowers throughout March. Very attractive autumn colour.

Pandora
Colt 5038057001225 5m/3m
Upright habit, spreading with age. Bronze young leaves, orange-red in autumn with single pink flowers.

Pink Perfection
Colt 5038057001232 3m/3m
Bronze young leaves. Double, rose-pink flowers appearing in long clusters.

Prunus

Princess
Myro/St J 5038057012672 3m/3m
The branches are covered in clusters of pale pink flowers all through spring. The oval-shaped green leaves contrast with the smooth, glossy deep brown bark. It also has edible plums.

Royal Burgundy
Colt 5038057001249 5m/3m

Royal Flame (P)
Colt 5038057013556 5m/3m
Fully covered with pure white, fragrant flowers in early spring and bronze-coloured young foliage which matures to a bright green in summer. Has upright growth with a pyramidal, uniformly branched crown.

Prunus

Shirofugen
Colt 5038057001287 6m/6m
Coppery young leaves. Flowers pink in bud opening to double white and then turning pink.

Shirotae
Colt 5038057001294 4m/5m
Vigorous tree, slightly drooping branches. Distinctly fringed leaves. Large, fragrant, single to semi-double white flowers appear in long clusters.

Shogetsu
Colt 5038057001270 4m/6m
The ‘Blushing Bride’ has large, pure white, double flowers, pink in bud. Stunning orange-red autumn colour. Fantastic elegant spreading habit.
Prunus Princess

A truly pretty tree perfect for small to medium gardens, the branches are covered in clusters of pale pink flowers all through the spring. The oval-shaped green leaves contrast with the smooth, glossy deep brown bark. Lovely autumn colour complimented by edible plums.

3m x 3m in 20 years.
Prunus Snow Showers
(Hillings Weeping)
A beautiful small weeping tree suitable for small gardens. Masses of single white flowers clothe the pendulous branches in late March and early April. Rich autumn foliage colour. Very popular with bees!

3m x 3m in 20 years.

- **Pyrus calleryana**
  - **Chanticleer**
  - **Calleryana** 5038057007654 5m/3m
  - A narrow, pyramidal growing habit with glossy green leaves which turn shades of purple and red during autumn. Masses of white flowers are formed during March and April.

- **Pyrus salicifolia**
  - **Pendula**
  - **Calleryana** 5038057001409 4m/4m
  - The Weeping Pear. Silver, willow-like leaves on pendulous branches. Small white flowers produced in April and May.

**Quercus**

- **Quercus ilex**
  - Evergreen Oak or Holm Oak. A large but slow growing tree with attractive bark. Leathery, dark green glossy leaves. Thrives in coastal areas.

- **Quercus robur**
  - **Common or English Oak**
  - **5038057001423** 10m/6m
  - A slow growing, but ultimately large and long-lived tree. Leaves shallowly lobed with numerous fruits or acorns in the autumn.

- **Quercus rubra**
  - **The Red Oak**
  - **5038057001430** 10m/8m
  - Large, oval, lobed leaves turn red and finally brown before falling in autumn.

**Robinia**

- **Robinia pseudoacacia**
  - **Frisia**
  - **5038057001447** 8m/4m
  - A small to medium sized tree with leaves that are a rich golden yellow from spring to autumn.

- **Prunus**
- **Very large, single white flowers show up well against the copper coloured young foliage in mid April. Rich autumn foliage colour.**

**Root Stock**

Robinia x margaretta

Pink Cascade

5038057001942  7m/4m

A small to medium sized tree with leaves that are a rich golden yellow from spring to autumn.

Robinia x slavinii

Hillieri

5038057001454  6m/4m

Delicate green leaves with racemes of lilac-pink flowers which appear in early summer and are slightly fragrant.

Salix alba

Britzensis

5038057001478  10m/8m

Most conspicuous in the winter when the branches are brilliant scarlet-orange and show up well.

Salix caprea

Pendula TW 120cm stem

5038057001492  2m/2m

The Kilmarnock Willow. A small, umbrella-like tree with stiffly pendulous branches. Attractive silvery catkins studded with golden anthers in the late winter. Top worked onto a bare S. caprea stem.

Salix caprea

Pendula TW 150cm stem

5038057001485  2.5/2.5m

As the Pendula TW 120cm stem but with a 150cm stem top worked.

Salix chrysocoma

A beautiful medium sized, wide-spreading, weeping tree. The bark is a golden yellow colour and contrasts well with the lime green leaves. Catkins appear with the leaves in late April.

Salix matsudana

Tortuosa

5038057001522  6m/4m

An unusual feathered form of tree with branches which are both twisted and contorted. Ideal for damp conditions.

Salix purpurea

Pendula TW 150cm stem

503805700153  3.5/2.5m

An attractive form with long, pendulous purple branches and narrow blue-green leaves. 150cm stem top worked.

Salix

Erythroflexuosa

5038057001515  5m/3m

A small tree with vigorous orange-yellow shoots that are twisted and contorted, as are the narrow leaves.

A compact, upright tree with ascending branches and large clusters of orange-red fruits in autumn.
Sorbus commixta Olympic Flame

A superb selection of Sorbus Dodong, with large shiny green foliage which turns an amazing brilliant orange-red colour in autumn. Creamy-white flowers followed by orange-red berries.

6m x 4m in 20 years.
### Sorbus

**Sorbus aucuparia**
- **Barcode:** 5038057001577
- **Height/Spread:** 6m/4m

Small to medium sized native Rowan. The mid green leaves turn yellow or red in autumn. Bright red fruits, generally in large clusters, are formed in autumn.

**Sorbus cashmiriana**
- **Barcode:** 5038057001621
- **Height/Spread:** 4m/3m

A slow growing, beautiful small tree with an open growing habit and dark green leaves. Soft pink flowers in May and June, followed by pure white berries which hang in drooping clusters beneath the branches.

**Sorbus commixta**
- **Barcode:** 5038057010883
- **Height/Spread:** 6m/4m

A superb selection of Sorbus Dodong, with large shiny green foliage which turns an amazing brilliant orange-red colour in autumn. Creamy-white flowers followed by orange-red berries.

**Sorbus hupehensis**
- **Barcode:** 5038057001645
- **Height/Spread:** 6m/4m

The delicate blue-green foliage turns to red in autumn whilst the pink berries pale to white.

**Sorbus hupehensis**
- **Barcode:** 5038057001645

Peach Me Red
Apple Ellisons Orange
Plum Victoria
Fruit Trees

With over 40 years experience at our New Place Nurseries site, we are proud to offer a comprehensive range of high quality fruit trees using certified stocks.

This includes Apples, Pears, Cherries, Plums and Damsons. Look out for the amazing Peach Me Red; its innovative rootstock ensures you can enjoy a full crop of Peaches even when growing in a container.

Our range now features many trees produced on dwarf or semi-dwarfing rootstocks which are more suited to small and medium gardens. Keep an eye out for the M26 (semi-dwarf), M27 (very dwarf) rootstocks and the Starline range of Apples which produces fruit on a Pillar tree.
Apple Rootstocks and Pollination Guide

MM106 - Semi Vigorous
Suitable for most soils and exposed sites. Ultimate height around 3.5m in ten years.

M26 - Semi Dwarf
Good for restricted spaces, requires staking. Ultimate height 2.5m in ten years.

M27 - Dwarf
Ideal for small gardens or tub culture, requires staking. Ultimate height less than 2m in ten years.

A2 - Very Dwarf
Ideal for very small gardens and container growing trees. Ultimate height 1-2m in ten years.

Half Standard
Usually grown on an MM106 rootstock, grown with a clear stem and formed head. Ultimate height 3.5-4m in 10 years.

Blenheim Orange
Eater / cooker. Yellow-gold with an orange flesh coloured fruit with a nutty flavour. Good dual-purpose apple with mid-season flowering. Harvest in October.
Pollination group 3

Bountiful
Eater / cooker. Pale green to yellow fruits which are soft and juicy and give great dual purpose use. Ideal for the smaller garden if Bramley is too large. Mid season flowering. Harvest in September.
Pollination group 3
Apple Braeburn

Eater. Red-striped fruit with a red blush on a yellow background. A New Zealand variety with crisp aromatic fruit. Requires a sheltered position. Mid-season flowering, harvest in October.

Self-fertile

Bramley Seedling

Cooker. Green to greenish-yellow coloured fruit. Probably the best known cooking apple around, with a strong tart flavour ideal for culinary uses and cider. Mid-season flowering. Harvest in October.

Self-fertile

Cox’s Orange Pippin SF

Eater. Orange flush over greenish-yellow coloured fruit. An outstanding tree producing the quality fruit that you would expect from a Cox. Harvest in October. Particularly good for juice.

Pollination group 3
**Apple**

**Discovery**
Eater. Bright scarlet-red fruit. Crisp and juicy with a sweet flavour which slightly resembles strawberry. Early season flowering with good disease resistance. Particularly good for juice. Harvest in August.

Pollination group 3

---

**Egremont Russet**

Pollination group 3

---

**Ellisons Orange**

Pollination group 3
**Apple**

**Fiesta ®**
Eater. Cox-like fruit with a rich, sweet flavour. Mid season flowering. Harvest in October.

Pollination group 4

---

**Golden Delicious**
Eater / cooker. Greenish-yellow fruit that turn golden as they ripen. Very crisp fruit with sweet flavour. Late season flowering, harvest in November.

Pollination group 4

---

**James Grieve**
Eater / cooker. The fruit has red flush stripes over a pale green colour. Large, sweet and very juicy. A very heavy cropper with mid season flowering. Harvest in September.

Pollination group 3
Apple

**Jonagold**
Eater. A red fruit which is flushed with golden-yellow. This is a large apple with a sweet, juicy flavour. Has a vigorous growing habit and requires two pollinators. Late season flowering. Harvest in November.

Pollination group 4

**Jupiter ®**
Eater. Yellow and red striped fruit with a rich, sweet flavour, similar to Cox. A strong growing variety with heavy cropping. Mid season flowering. Harvest in October.

Pollination group 4

**Katy**
Eater. Bright scarlet-red fruit. Very good flavour, often used for making apple juice. Produces a heavy crop.

Pollination group 3
**Apple**

**Kidd’s Orange Red**
Eater. Yellow and red striped fruit. A crisp, aromatic apple with a sweet, juicy flavour perfect for juice. Has good disease resistance and well suited to northern areas. Mid season flowering. Harvest in October.

Pollination group 3

**Laxton’s Superb**
Eater. The fruit has a purple flush and red stripes over greenish-yellow. Sweet and aromatic flavour. Crops very heavily, but often biennial. Late season flowering. Harvest in November. A very understated variety.

Pollination group 4

**Limelight**
Eater. An excellent, compact, disease resistant variety. Heavy cropping, the fruit is yellow, crisp and refreshing, perfect for juice. Picked in September can be eaten until November.

Pollination group 3
Apple

**Lord Lambourne**
Eater. Bright red fruit with green-yellow stripes. A juicy and mellow flavour with a hint of strawberry, perfect for juice. A reliable cropper, mid season flowering. Harvest in October.

Pollination group 2

Apple Sunset
Sunset is a popular Cox-style apple, which we recommend as one of the best alternatives to Cox’s Orange Pippin, as it is much easier to grow. The parentage is not known but it is almost certainly a seedling of Cox. Disease resistance is far better, cropping is reliable and it is self-fertile.

The flavour is balanced and sweet, with many aromatic qualities. Sunset also has the attractive orange flush so characteristic of Cox and other traditional English apples. Harvest in mid September.
Apple

Sunset
Eater. The fruit has red stripes and an orange flush over gold. Has a very crisp, rich flavour. Mid season flowering. Harvest in September.

Pollination group 3

Worcester Pearmain
Eater. Orange-red fruit and a juicy flesh which has a strawberry flavour. Mid season flowering, a heavy cropping variety.

Pollination group 3

Apple - Starline

Starline Blue Moon (P)
Eater. Heavy cropping with attractive purple-blue fruit with a juicy crisp flesh and a sweet/sharp flavour. Self-fertile and resistant to scab and mildew. Perfect for small gardens and large containers. Harvest from August to September.
Apple Starline Blue Moon (P)
Eater. Heavy cropping with attractive purple-blue fruit with a juicy crisp flesh and a sweet/sharp flavour. Self-fertile and resistant to scab and mildew. Perfect for small gardens and large containers. Harvest from August to September.

Starline are a range of slender, compact columns that grow on average up to only 2 metres tall, bearing heavy crops along the full length of the stem. Wonderful to see in blossom. Plant just 60cm apart.

Starline can be grown in the garden border, planted to create a walk through, in rows in a mini orchard, as a hedge or in tubs on a patio. They are very easy to manage and picking is easy. The fruits ripen to perfection and have an excellent flavour which becomes stronger with more sunshine. Crops can be very heavy with an apple capable of producing 30 or more full sized fruits for years.

Perfect for small gardens or large containers.
Apple - Starline

**Starline Firedance (P)**
Eater. Heavy cropping with medium sized, bright yellow-orange fruit with crisp flesh and slightly sharp flavour. Self-fertile and resistant to scab and mildew. Perfect for small gardens and large containers. Harvest from September to October.

**Starline Garden Fountain (P)**
Eater. Heavy cropping with medium sized, green-yellow fruit with a mild, well-balanced flavour. Self-fertile and resistant to scab and mildew. Perfect for small gardens and large containers. Harvest from September to October.

**Starline Golden Gate (P)**
Eater. Heavy cropping with medium sized, orange-red fruit with a firm flesh and pleasantly sharp flavour. Self-fertile and resistant to scab and mildew. Harvest from September to October. Perfect for small gardens and large containers.
Apple - Starline

Starline Greenfinch (P)
Eater. Heavy cropping with large green fruit with a firm, crisp flesh and slightly acidic flavour. Self-fertile and resistant to scab and mildew. Perfect for small gardens and large containers. Harvest from September to October.

Cherry

For fruiting cherries we have selected what we feel are the best self-fertile, good cropping varieties. Easy to grow and ideal for small to medium sized gardens.

Cherry Rootstocks

Colt - Semi Vigorous
Suitable for most soils and exposed sites, ultimate height around 3.5m in ten years.

Half Standard
Grown on a Colt rootstock, grown with a clear stem and formed head. Ultimate height 3.5-4m in 10 years.

Morello
Cooker. Large, dark red-black fruit with an acidic flavour. Very hardy. Reliable crops, even on a north facing wall. Bears fruit on the young wood only, so prune for reliable cropping each year.
Cherry

**Stella**
Eater. Large dark red fruit with a sweet and juicy flavour. A heavy cropping variety. Self-fertile.

**Colt**
Half Standard

<table>

Damson and Gage Rootstocks

St Julian - Semi Vigorous
Suitable for most soils and exposed sites, ultimate height around 3.5m in ten years.

Damson

Farleigh
Cooker. Small black fruits of good quality, very hardy and reliable for colder areas.

Self-fertile
**Merryweather**
Eater / cooker. Very large dark blue-black fruit is excellent for eating and culinary uses.

Self-fertile

**Shropshire Prune**
Cooker. A reliable cropper with small blue-black fruit which is great for cooking.

Self-fertile

**Old Greengage**
Eater. Small yellowish-green fruits with an excellent flavour, reliable heavy cropper. Available for picking in August.

Partially self-fertile.
Gage

Oullins Golden
Eater / cooker. A French Gage with a classy, sweet flavour. Probably the best gage for the flavour. Can pick mid to late August.

---

Medlar

Nottingham
A small tree of distinctive appearance with attractive, large, single white flowers followed by brown fruits. Can be picked in late October.

---

Peach

Peach Me Red ®
Perfect for small gardens and containers, with normal sized peach fruits. Good cropping from a small growing tree. Needs a warm aspect. Produced in a 10 litre container.
Peach Me Red ®
An absolute fruit treasure! This amazing tree, produced on a special dwarf rootstock, can be grown at home no matter how limited the space. Grafted on a hybrid rootstock from Spain, this incredible patio peach was grown with small spaces in mind. Its innovative rootstock ensures success in containers, making it perfect for planting in a pot on the patio, deck or balcony. You can enjoy a full-sized harvest from a compact, container-planted tree, or plant in-ground and pick twice the amount of fruit of an ordinary peach tree, but using half the space! Harvest August to September.
Pear Rootstocks

Quince A - Semi Dwarf
Suitable for most soils and exposed sites, ultimate height around 3.2m in ten years.

Beurre Hardy
Eater. Green-yellow fruit with light brown russet patches. Tender and juicy.
Pear

**Concorde ®**
Eater. Pale green with patches of golden russet. Sweet with a mild flavour. A heavy cropping variety.

**Conference**

**Doyenné du Comice**
Eater. Bright green, turning to yellow. Very juicy and sweet. Best flavoured variety.
Pear

Williams Bon Chretien
Eater.  Pale green, turning golden yellow.  Very juicy and sweet.

Plum

Czar

Marjorie’s Seedling
Eater / cooker.  Large purple fruit that has a juicy, sweet flavour.  Pick in late July.  Self-fertile.
**Plum, Quince**

**Fruit Trees**

**St Julien**

- **Plum, Quince**
  - **Vranja**
    - Cooker. This is a reliable cropper with large, pale green-yellow fruits with a good flavour. Self-fertile.

**Victoria**

- **Eater/cooker.** Bright purple-red fruit with a good flavour and many uses. Undoubtedly the most popular variety.

Redcurrant Rovada
Gooseberry Hinnomaki Yellow
Blackcurrant Ben Tirran (P)
We offer a comprehensive collection of soft fruit, perfect for beginners to ‘grow your own’ or for more experienced growers to grow in larger amounts in either the garden or allotment.

High in vitamins, soft fruit plants are easy to grow and highly rewarding to eat the juicy fruits produced. You can select a popular fruit such as Blueberries, Blackberries, Blackcurrants, Gooseberries, Raspberries, or the more exotic Fig and Kiwi fruit.

All our soft fruit plants are produced in 3 litre containers apart from Raspberries which are produced in 4 litre containers with 5 canes.
### Blackberry

- **Chester**
  - Height/Spread: 4m/3m
  - Description: Excellent thornless variety which thrives in dry conditions and shows good disease resistance. Large, firm fruit with excellent flavour, produced from mid August until early October.
  - Barcode: 5038057004028

- **Loch Tay (P)**
  - Height/Spread: 1.5/1.5m
  - Description: Hardy, thornless variety with good disease resistance. Heavy yields of large, firm fruits with excellent flavour produced from late July until the end of September.
  - Barcode: 5038057004035

- **Ben Sarek (P)**
  - Height/Spread: 1.5/1.5m
  - Description: High yielding, frost resistant, early season variety. The large fruits are produced in mid July on compact bushes which are mildew resistant.
  - Barcode: 5038057003892

### Blueberry

- **Ben Tirran (P)**
  - Height/Spread: 1.2/1.2m
  - Description: High yielding, frost resistant, late fruiting variety. Medium sized fruit are produced in mid August on vigorous bushes which are mildew resistant.
  - Barcode: 5038057003908

- **Bluecrop**
  - Height/Spread: 2m/1.5m
  - Description: Mid-season. Probably the best all-round variety. Large delicious berries produced in early-mid August on this heavy fruiting variety. Striking gold and scarlet autumn foliage.
  - Barcode: 5038057004097

- **Blue Suede (P)**
  - Height/Spread: 1.5/1.5m
  - Description: A self-fertile variety that has a nice compact growing habit and very good autumn colour. Produces an abundance of larger than average light blue fruits with a good sweet flavour.
  - Barcode: 5038057011170

- **Chandler**
  - Height/Spread: 2m/2m
  - Description: A late season variety, fruiting from August to mid September. A reliable, heavy cropper with very large, firm, tasty fruit. Bronze-red foliage in spring, followed by cream flowers.
  - Barcode: 5038057004134

- **Elliott**
  - Height/Spread: 1.5m/1m
  - Description: A late season variety, fruiting from late August and throughout September. The reddish stems of the plant contrast well with the grey-green leaves and sky-blue berries.
  - Barcode: 5038057007692

- **Pink Lemonade**
  - Height/Spread: 1.6/1.5m
  - Description: Produces delicious pink blueberries! The fruits form without the need of a pollination partner, after the bell-shaped, pinkish-white flowers have faded. The berries have a mild flavour and a firm flesh.
  - Barcode: 5038057013419

---

*Plant Breeders Rights apply*
Blueberry Sunshine Blue (P)

This Blueberry has so many excellent qualities that it is almost a new kind of plant. Has a dense, rounded, semi-dwarf form making it a great choice for containers. Semi evergreen.

An excellent self-fertile variety, which means that you only need one plant. The other beauty is that it’s perfect for tub growing on patios, highly ornamental, with shocking pink flowers in the spring. Highly recommended. Like most blueberries plant in a lime free compost.
**Blueberry**

**Spartan**

5038057004158

2m/1.5m

An early season variety, fruiting at the end of July. Vigorous, upright growing plant with large glossy leaves which give good autumn colour. Large fruit with good flavour.

**Sunshine Blue (P)**

5038057005506

90/90cm

This self-fertile dwarf is ideal for growing in containers in lime-free compost. This variety grows no taller than 1m and produces snowy-pink flowers fading to white in spring.

**Brown Turkey**

5038057008552

5m/2m

A compact growing Fig with large brown pear-shaped fruit which has red flesh and excellent flavour.

**Gooseberry**

**Hinnonmaki Red**

5038057003915

1.2/1.2m

A well recommended, hardy variety with excellent resistance to mildew. Produces a heavy crop or large, dark red fruit with excellent flavour in mid July.

**Hinnonmaki Yellow**

5038057005186

1.2/1.2m

A recommended, hardy variety with excellent resistance to mildew. Heavy cropping with large yellow fruit with an aromatic flavour and tint of apricot. The plant has a spreading habit that may benefit from support.

**Invicta (P)**

5038057003922

1.5m/1m

A very high yielding green fruiting variety. The fruit is produced in late July and can be used for dessert or culinary purposes. Vigorous variety which is mildew resistant.

**Kiwi Fruit**

**Jenny**

5038057004127

6m/4m

An excellent hardy climbing plant for covering walls. Crops reliably south of the Midlands will produce good quality fruit. Self fertile.

**Thornless L7654**

5038057004042

2m/2.5m

A thornless clone of the Loganberry. Large, dark red fruit with a sharp taste produced from mid July until the end of August. Excellent for culinary uses but not for eating fresh. A very heavy cropper.

**Raspberry (5 canes to a pot)**

**Allgold**

5038057005179

2.5/0.5m

A yellow fruited primocane variety, fruiting from early August to early October. The fruit is strongly coloured, sweeter and superior to Autumn Bliss.
Raspberry

Raspberry (5 canes to a pot)

Autumn Bliss (P)

5038057003939
2m/2m

A recommended variety, fruiting from August to early October. The fruit is medium sized with a firm texture and good flavour.

Glen Ample (P)

5038057003946
2m/1.8m

Mid season variety producing extremely high yields of fruit on spine-free vigorous canes. The large fleshy fruit which is produced during July is of excellent flavour.

Glen Clova

5038057003953
1.3/0.5m

Popular early July fruiting variety which is one of the earliest to fruit each summer. Heavy crops of firm berries with reasonable flavour can be used for many purposes including freezing.

Redcurrant

Raspberry (5 canes to a pot)

Tulameen (P)

5038057003960
2m/1.8m

Excellent variety with a very long picking season from late June until the middle of August. Heavy yielding variety, producing large, bright, glossy fruit with excellent flavour.

Rovada

5038057003977
1.5/1.5m

Attractive August fruiting variety with high yields of large, bright, glossy red fruit held on long trusses. An ideal variety for garden planting.

Timperley Early

5038057003991
1.5/2.5m

This early fruiting variety will produce rhubarb outside from late February if forced, to October if watered during the summer. The medium sized sticks are well coloured with good flavour.

Tayberry

Rhubarb

Rhubarb

Victoria

5038057004004
0.6/1.2m

A long established variety with rhubarb between April and May which is recognised for its excellent flavour.

Buckingham

5038057004066
2m/2m

An exciting hybrid berry which is identical to the original tayberry except that the canes are thornless. Large, juicy red fruit from mid July to mid August.

Blanka

5038057004011
1.5/1.5m

An excellent Dutch variety which in trials has proven to be the highest yielding whitecurrant variety. Large, firm, pale yellow-white berries are produced on long trusses.

Whitecurrant

Rhubarb, Redcurrant, Rhubarb, Tayberry
1. INTRODUCTION
1.1. In these conditions, the “Company” means New Place Nurseries Ltd. the “buyer” means each person, firm or company purchasing any goods, “consumer” means any person, firm or company purchasing any goods for purposes which are outside his trade, business or profession; the “Container Centralen” Act 1977 and “goods” means the materials or supplies to be supplied to the Company by the buyer.

2. GUIDELINES
2.1. The purchase order shall not be binding upon the Company unless and until it is confirmed in writing by an authorised representative of the Company.

3. PRICES
3.1. The price payable for the goods shall be as provided below or as quoted in the Company’s price list in force at the date of despatch or collection. The Company reserves the right to vary any such price without notice at any time prior to contract.

3.2. All prices for goods quoted by the Company are exclusive of Value Added Tax but are carriage paid to destinations in the United Kingdom (excluding islands other than the Isle of Wight).

4. PAYMENT
4.1. Payment of invoices shall be made in full without deduction, set off or claim on no later than the time specified on the relevant invoice, time to be of the essence.

4.2. Where an invoice is not paid by its due date then the buyer shall pay to the Company interest on the overdue amount at the rate of 8% per annum. All costs, expenses and liabilities of whatever nature incurred by the Company in recovering or settlement of debts not paid by the due date.

4.3. The date that the Company has been paid shall be the date that the Company’s bank irrevocably credits the Company’s account.

4.4. The Company’s agreement to sell goods to the buyer shall remain and be effective unless made in writing by a duly authorised representative of the Company.

5. DELIVERY AND PASSING OF PROPERTY AND RISK TO THE BUYER
5.1. Goods shall be delivered at the place of delivery as stated on the invoice or on collection by or on behalf of the buyer.

5.2. Risk of damage to or loss of goods shall pass to the buyer at the time of delivery or collection if the buyer wrongly fails to take delivery of the goods at the time when Container CENTRALEN has refused delivery.

5.3. If the buyer fails to take delivery of any goods ordered by him the buyer shall pay the Company a commercial rate of interest on the invoice value of such goods and having done so shall have no further liability to the buyer in respect of such defect or failure. All goods subject to credit note or replacement shall be returned to the Company.

5.4. The Company shall ensure that the goods are safe for the purposes of repossessing them.

6. DANISH TROLLEYS
6.1. If goods are delivered to the Buyer by Container-Centralen Trolleys and Pot Plants and other containers and these are left at the Buyer’s premises, the following terms and conditions shall apply.

6.1.1. It shall be assumed that any containers and trolleys delivered by the Company to the Buyer shall be used for no purpose other than for containing plants delivered by the Company.

6.1.2. The buyer shall remain responsible for the condition and state of the trolleys and containers shall be in no circumstances pass to the Buyer.

6.1.3. All such trolleys, containers and trolleys (or equivalent in number and condition) are returnable to the Company on demand and the Buyer shall pay for the cost of any repairs or reconditioning. In the case of any defects or damage (irrespective of whether the goods are fit for their normal purpose), the Buyer shall be liable to the Company to make good such defects or failures and to bear the cost of any repairs or reconditioning.

6.1.4. While such trolleys, containers and trolleys are on the Buyer’s premises or within the Buyer’s control, the Buyer shall take all reasonable steps to ensure that none of the goods are delivered to a third party by the Buyer or a person acting on behalf of the Buyer.

6.1.5. All trolleys and containers shall be exchanaged like for like vi.

6.1.6. Returned trolleys must have Container Centralen identification.

6.1.7. Non-exchange of like for like trolleys will incur daily rental charges. vi.

6.1.8. The buyer shall remain liable for payment of the part of the price that is reasonably thought to be stored for the purposes of repossessing them.

6.1.9. The buyer shall not be entitled to pledge or assign any way charge by way of security for any indebtedness any of the goods in respect of which title has not passed to the buyer in accordance with sub-clause 5.5 above. vi.

6.2. The buyer acknowledges that where the Company gives (either on the packaging of the goods supplied or in accompanying literature or in the Company’s trade literature dealing with the goods) particular written instructions or recommendations for the storage, handling or other use of or otherwise in connection with the goods, it is essential that those instructions or recommendations should be followed and that failure to do so, or deviation from them, or any other events arising out of or in connection with the goods all moneys owing by the buyer to the Company shall (without prejudice to any other right or remedy of the Company) become due and payable.

10. NO WAIVER
10.1. No forbearance or indulgence by the Company shown or granted to the buyer whether in respect of these terms or otherwise shall in any way affect or prejudice any rights of the Company or be regarded as a waiver of any rights of the Company against the buyer.

11. GENERAL
11.1. All disputes arising out of or in connection with the contract, shall be governed by English law and, in entering into the contract the buyer submits to the non-exclusive jurisdiction of the English Courts.

12. FORCE MAJEURE
12.1. This contract may be terminated or suspended in whole or in part by the Company in the event of the occurrence or happening of any event or events which are reasonably thought to be beyond the control of the Company, shall be regarded as a waiver of any rights of the Company against the buyer.

12.2. The Company shall have no control over the storage or any other use of the goods or over weather or other environmental conditions or the acts or omissions of others, if and when the buyer chooses to inspect or use the goods. Each of these matters can affect the nature, characteristics and performance of goods supplied by the Company.

12.3. The buyer acknowledges that the Company has no control over the storage or any other use of the goods or over weather or other environmental conditions or the acts or omissions of others, if and when the buyer chooses to inspect or use the goods. Each of these matters can affect the nature, characteristics and performance of goods supplied by the Company.

12.4. In the event that the buyer suffers any loss as a result of any losses, costs, expenses or liabilities arising out of the goods, their use or storage or otherwise.

12.5. Subject as expressly provided in these conditions all warranties, conditions or representations, express or implied, custom, practice or otherwise are excluded to the fullest extent permitted by law. The Company shall not in any circumstances be liable for any indirect or consequential losses arising directly or indirectly from in or in connection with the goods. Without prejudice to the above should the Company be found liable in any circumstances including negligence or breach of duty in respect of in or in connection with the goods, any compensation and damages payable under any claim or claims howsoever arising shall in no case exceed more than 10 times the price at which the claimant purchased the particular goods forming the subject of the claim.

12.6. The Company acknowledges that the Company’s employees or agents are not authorised to make any representation or give any warranty or give advice concerning the goods unless such representation warranty or advice has been previously confirmed in writing by the Company to the buyer. The buyer acknowledges that it does not rely on, and waives any claim in connection with, any such representations or advice which is not so confirmed.

12.7. By entering into this contract the buyer acknowledges and confirms that it is not a consumer, that it does not seek to treat the goods, or any part thereof, as its own and that it is purchasing the goods with the intention of re-selling the same to consumers in accordance with its business.
