

Lavandula angustifolia Platinum Blonde (P)

Origanum Amethyst Falls (VR)

Mentha Chocolate Mint

Salvia Rutilans Pineapple Sage

# Herbs

Vibrant and attractive to bees and butterflies, these plants provide both texture and fragrance to the garden border or patio container. Ideal for a sunny, dry position.

Our year round Lavender liners, produced at our nursery in Portugal, ensure maximum sales opportunities from early spring onwards.

## Artemisia

French Tarragon has pale, mid-green lance-like scented leaves on upright stems. Grown specifically for its foliage but will produce small yellowish, green-white ball shaped flower heads which rarely open.

## Lavandula

angustifolia or English Lavender is the most popular garden perennial. The fragrant flowers and foliage make it a favourite for herb gardens and the perennial border. Platinum Blonde features striking variegated foliage which contrasts beautifully with the lilac blue flowers.

stoechas types or French/Spanish Lavender are not as hardy as angustifolia types but have superior summer flowering performance. Their large and colourful flower spikes make them perfect for summer flowering pot sales. Adored by bees and butterflies.

## Salvia

officialis are common Sages with colourful and aromatic foliage. Forming a low evergreen mound they look great in mixed containers as well as traditional herb gardens / borders. Elegans or Pineapple Sage feature scarlet-red tubular flowers atop cordate-shaped green foliage which, when rubbed, emits a strong but pleasant scent.
