

Redcurrant Rovada

Gooseberry Hinnonmaki Yellow

Blackcurrant Ben Tirran (P)

Soft Fruit

We offer a comprehensive collection of soft fruit, perfect for beginners to 'grow your own' or for more experienced growers to grow in larger amounts in either the garden or allotment.

High in vitamins, soft fruit plants are easy to grow and highly rewarding to eat the juicy fruits produced. You can select a popular fruit such as Blueberries, Blackberries, Blackcurrants, Gooseberries, Raspberries, or the more exotic Fig and Kiwi fruit.

All our soft fruit plants are produced in 3 litre containers apart from Raspberries which are produced in 4 litre containers with 5 canes.

Blackberry

Blackberry

Chester

5038057004028

4m/3m

Excellent thornless variety which thrives in dry conditions and shows good disease resistance. Large, firm fruit with excellent flavour, produced from mid August until early October.

Blackberry

Loch Tay (P)

5038057004035

1.5/1.5m

Hardy, thornless variety with good disease resistance. Heavy yields of large, firm fruits with excellent flavour produced from late July until the end of September.

Blackcurrant

Blackcurrant

Ben Sarek (P)

5038057003892

1.5/1.5m

High yielding, frost resistant, early season variety. The large fruits are produced in mid July on compact bushes which are mildew resistant.

Blueberry

Blackcurrant

Ben Tirran (P)

5038057003908

1.2/1.2m

High yielding, frost resistant, late fruiting variety. Medium sized fruit are produced in mid August on vigorous bushes which are mildew resistant.

Blueberry

Bluecrop

5038057004097

2m/1.5m

Mid-season. Probably the best all-round variety. Large delicious berries produced in early-mid August on this heavy fruiting variety. Striking gold and scarlet autumn foliage.

Blueberry

Blue Suede (P)

5038057011170

1.5/1.5m

A self-fertile variety that has a nice compact growing habit and very good autumn colour. Produces an abundance of larger than average light blue fruits with a good sweet flavour.

Blueberry

Chandler

5038057004134

2m/2m

A late season variety, fruiting from August to mid September. A reliable, heavy cropper with very large, firm, tasty fruit. Bronze-red foliage in spring, followed by cream flowers.

Blueberry

Elliott

5038057007692

1.5m/1m

A late season variety, fruiting from late August and throughout September. The reddish stems of the plant contrast well with the grey-green leaves and sky-blue berries.

Blueberry

Pink Lemonade

5038057013419

1.6/1.5m

Produces delicious pink blueberries! The fruits form without the need of a pollination partner, after the bell-shaped, pinkish-white flowers have faded. The berries have a mild flavour and a firm flesh.

Height/Spread

Blueberry Sunshine Blue (P)

This Blueberry has so many excellent qualities that it is almost a new kind of plant. Has a dense, rounded, semi-dwarf form making it a great choice for containers. Semi evergreen.

An excellent self-fertile variety, which means that you only need one plant. The other beauty is that it's perfect for tub growing on patios, highly ornamental, with shocking pink flowers in the spring. Highly recommended. Like most blueberries plant in a lime free compost.

Blueberry

Blueberry

Spartan

5038057004158

2m/1.5m

An early season variety, fruiting at the end of July. Vigorous, upright growing plant with large glossy leaves which give good autumn colour. Large fruit with good flavour.

Blueberry

Sunshine Blue (P)

5038057005506

90/90cm

This self-fertile dwarf is ideal for growing in containers in lime-free compost. This variety grows no taller than 1m and produces snowy-pink flowers fading to white in spring.

Ficus carica

Brown Turkey

5038057008552

5m/2m

A compact growing Fig with large brown pear-shaped fruit which has red flesh and excellent flavour.

Gooseberry

Gooseberry

Hinnonmaki Red

5038057003915

1.2/1.2m

A well recommended, hardy variety with excellent resistance to mildew. Produces a heavy crop of large, dark red fruit with excellent flavour in mid July.

Gooseberry

Hinnonmaki Yellow

5038057005186

1.2/1.2m

A recommended, hardy variety with excellent resistance to mildew. Heavy cropping with large yellow fruit with an aromatic flavour and tint of apricot. The plant has a spreading habit that may benefit from support.

Gooseberry

Invicta (P)

5038057003922

1.5m/1m

A very high yielding green fruiting variety. The fruit is produced in late July and can be used for dessert or culinary purposes. Vigorous variety which is mildew resistant.

Kiwi Fruit

Kiwi Fruit

Jenny

5038057004127

6m/4m

An excellent hardy climbing plant for covering walls. Crops reliably south of the Midlands will produce good quality fruit. Self fertile.

Loganberry

Loganberry

Thornless L7654

5038057004042

2m/2.5m

A thornless clone of the Loganberry. Large, dark red fruit with a sharp taste produced from mid July until the end of August. Excellent for culinary uses but not for eating fresh. A very heavy cropper.

Raspberry

Raspberry (5 canes to a pot)

Allgold

5038057005179

2.5/0.5m

A yellow fruited primocane variety, fruiting from early August to early October. The fruit is strongly coloured, sweeter and superior to Autumn Bliss.

Raspberry

Raspberry (5 canes to a pot)

Autumn Bliss (P)

5038057003939

2m/2m

A recommended variety, fruiting from August to early October. The fruit is medium sized with a firm texture and good flavour.

Raspberry (5 canes to a pot)

Glen Ample (P)

5038057003946

2m/1.8m

Mid season variety producing extremely high yields of fruit on spine-free vigorous canes. The large fleshy fruit which is produced during July is of excellent flavour.

Raspberry (5 canes to a pot)

Glen Clova

5038057003953

1.3/0.5m

Popular early July fruiting variety which is one of the earliest to fruit each summer. Heavy crops of firm berries with reasonable flavour can be used for many purposes including freezing.

Redcurrant

Raspberry (5 canes to a pot)

Tulameen (P)

5038057003960

2m/1.8m

Excellent variety with a very long picking season from late June until the middle of August. Heavy yielding variety, producing large, bright, glossy fruit with excellent flavour.

Redcurrant

Rovada

5038057003977

1.5/1.5m

Attractive August fruiting variety with high yields of large, bright, glossy red fruit held on long trusses. An ideal variety for garden planting.

Rhubarb

Rhubarb

Timperley Early

5038057003991

1.5/2.5m

This early fruiting variety will produce rhubarb outside from late February if forced, to October if watered during the summer. The medium sized sticks are well coloured with good flavour.

Tayberry

Rhubarb

Victoria

5038057004004

0.6/1.2m

A long established variety with rhubarb between April and May which is recognised for its excellent flavour.

Tayberry

Buckingham

5038057004066

2m/2m

An exciting hybrid berry which is identical to the original tayberry except that the canes are thornless. Large, juicy red fruit from mid July to mid August.

Whitecurrant

Whitecurrant

Blanka

5038057004011

1.5/1.5m

An excellent Dutch variety which in trials has proven to be the highest yielding whitecurrant variety. Large, firm, pale yellow-white berries are produced on long trusses.
