 Dear Sir or Madam,

Once again this year, it is our pleasure to present you our new catalogue of young plant material of perennials and grasses from Vitroflora and Alkemade Perennials assortment.

In recent years, we have become market leader, offering the widest range of perennials and grasses on the market. What makes our wide assortment so unique? Our assortment meets the needs of both perennial growers focusing on the landscaping and garden architecture market, as well as specialist growers focusing on the visual market and supplying large retail chains.

Agnieszka Pawlak-Anhalt
Chief Operating Officer

Jeroen Meeder
Commercial Director

In our overwhelming range, you will find varieties suitable for potting in pots for the **visual market (labelled V)**, but also certainly for the well-known P9 market intended for **landscaping (labelled L)**.

Thanks to the many extensive trials at our facilities in Poland, the Netherlands, Germany and Portugal as well as at many customers across Europe, we can determine the suitability for both market segments with great care. This is why a variety is often marked with both a 'V' and an 'L'.

We would like to present you some Highlights:

Veronica Lansita

A beautiful compact to medium growing Veronica series with dazzling colours and excellent resistance to mildew and rust. The Lansita series has a very good branching and uniformity, which is a great advantage for the grower and consumer. The series is characterised by easy cultivation and no need for growth regulators. The quick cultivation period of approximately 8 to 10 weeks can be called fast. The Lansita series is suitable for 12 cm pots and also for 2 - 3 litre pots. Lansita is suitable for both indoor and outdoor cultivation.

Brunnera Little Heart

A charming and compact variety with abundant, beautifully shaped, silvery leaves. Suitable for both indoor and outdoor cultivation and fits well in 12 cm to even 3 litre pots. This beautiful Brunnera Little Heart is ideal for landscaping and spring flowering.

We constantly ensure that the starting material is clean and in perfect condition. For this, we use our own developed technologies for propagation, acclimatisation and preparation of the young plants.

For the convenience and relief of our customers, we offer a number of different standards for the starting material. Thanks to different production sites in Poland, the Netherlands and Portugal, we can guarantee the most optimal conditions for our starting material. All the above activities have only one goal: to provide you with the best quality material for a safe, carefree and above all, profitable cultivation.

Take a look at our website **www.vitroflora.com** where you will find the entire assortment. You can also easily, intuitively check the availability of your selected crops in the requested weeks and place your order via the linked online order system. We hope that by making full use of our assortment, you will be the next ambassador for whom the environment and nature are important.

Together we care for the beauty and richness of the world around us!

Vitroflora & Alkemade Team

We are a proud member of:

 Szanowni Państwo,

z wielką przyjemnością po raz kolejny w tym roku przedstawiamy Państwu nasz nowy katalog sadzonek bylin i traw ozdobnych z asortymentu Vitroflora oraz Alkemade Perennials.

W ostatnich latach staliśmy się liderem rynku, oferując największy wybór bylin i traw dostępnych na rynku. Co sprawia, że nasz asortyment jest tak wyjątkowy? Odpowiada on zarówno na potrzeby producentów specjalizujących się w roślinach przeznaczonych do architektury krajobrazu i nasadzeń miejskich, jak i tych ukierunkowanych na rynek wizualny, zaopatrujących sieci handlowe.

W naszej niezwykle szerokiej ofercie znajdują Państwo odmiany idealne do uprawy w doniczkach **przeznaczonych na rynek wizualny (oznaczone symbolem V)**, jak również odmiany sprawdzone w popularnym segmencie P9, **wykorzystywanym w projektach krajobrazowych (oznaczone L)**.

Dzięki licznym, szeroko zakrojonym testom prowadzonym w naszych ośrodkach w Polsce, Holandii, Niemczech i Portugalii, a także u wielu klientów w całej Europie, możemy z dużą precyzją określić przydatność poszczególnych odmian do obu segmentów rynku. Dlatego wiele z nich oznaczonych jest jednocześnie literami V i L.

Z radością przedstawiamy Państwu kilka wybranych nowości:

Veronica Lancita

Piękna, kompaktowa do średniowysokiej seria przetaczników o intensywnych barwach i doskonałej odporności na mączniaka i rdzę. Lancita charakteryzuje się bardzo dobrą rozkrzewialnością i wyrównanym wzrostem, co stanowi istotną zaletę zarówno dla producenta, jak i konsumenta. Odmiana łatwa w uprawie, nie wymaga stosowania regulatorów wzrostu. Krótki czas produkcji – około 8–10 tygodni – pozwala zaklasyfikować ją jako szybkorosnącą. Doskonała do doniczek 12 cm, a także pojemników 2–3 litrowych. Nadaje się do uprawy zarówno w szklarniach, jak i na zewnątrz.

Brunnera Little Heart

Uroczą, kompaktową odmianę o obfitym ulistnieniu i pięknie wykształconych, srebrzystych liściach. Idealna do uprawy pod osłonami i w gruncie. Doskonale sprawdza się w doniczkach 12 cm, jak i większych – nawet 3-litrowych. Little Heart to świetna propozycja do nasadzeń krajobrazowych i na wiosenne kwitnienie.

Nieustannie dbamy o to, by nasz materiał wyjściowy był zdrowy i w doskonałej kondycji. W tym celu wykorzystujemy własne, nowoczesne technologie rozmnażania, aklimatyzacji i przygotowania sadzonek.

Dla wygody naszych klientów oferujemy różne standardy materiału wyjściowego. Dzięki zróżnicowanym lokalizacjom produkcyjnym w Polsce, Holandii i Portugalii możemy zapewnić optymalne warunki dla jego rozwoju. Wszystkie te działania mają jeden nadrzędny cel – dostarczyć Państwu najwyższej jakości materiał roślinny, gwarantujący bezpieczną, bezproblemową i przede wszystkim opłacalną produkcję.

Zapraszamy do odwiedzenia naszej strony internetowej www.vitroflora.pl, gdzie znajdują Państwo pełny asortyment. Za jej pośrednictwem w łatwy i intuicyjny sposób mogą Państwo sprawdzić dostępność wybranych roślin w konkretnych tygodniach oraz złożyć zamówienie online.

Mamy nadzieję, że korzystając w pełni z naszego asortymentu, staną się Państwo kolejnym ambasadorem, dla którego piękno przyrody i troska o środowisko są ważne. Razem dbajmy o piękno i bogactwo otaczającego nas świata!

Zespół Vitroflora i Alkemade Perennials

 Geachte heer/mevrouw,

ook dit jaar is het ons een genoegen om u onze nieuwe catalogus te presenteren van het jong plantmateriaal van vaste planten en grassen uit het Vitroflora en Alkemade Perennials assortiment.

De afgelopen jaren zijn we uitgegroeid tot marktleider en bieden we het breedste sortiment vaste planten en grassen op de markt aan. Wat ons brede assortiment zo uniek maakt is dat het zowel voldoet aan de behoeften van vaste plantenkwekers die zich richten op de landscaping- en tuinarchitectuurmarkt, maar ook gespecialiseerde kwekers die zich op de visuele markt richten en aan de grote winkelketens leveren.

In ons overweldigende assortiment, treft u variëteiten aan die geschikt zijn voor het oppotten in potten voor de **visuele markt (aangeduid met het label V)**, maar ook zeker voor de welbekende P9 markt bedoeld voor **landscaping (aangeduid met het label L)**.

Dankzij de vele experimenten en proeven die we op onze eigen locaties in Polen, Nederland, Duitsland en Portugal alsook bij vele klanten verspreid over Europa hebben uitgevoerd, kunnen we met grote zorgvuldigheid de geschiktheid voor de beide marktsegmenten bepalen. Daarom staat er vaak bij een ras zowel een "V" alsook een "L".

Graag willen wij een aantal high-lights aan u presenteren.

Veronica Lancita

Een prachtige compacte tot middelmatig groeiende serie Veronica met oogverblindende kleuren en uitstekende resistentie tegen meeldauw en roest. De Lancita serie heeft een zeer goede vertakking en uniformiteit, wat een groot voordeel voor de kweker en consument is. De serie kenmerkt zich door een makkelijk teelt en geen behoefte aan groeiregulators. De snelle teeltduur van ca. 8 tot 10 weken, is snel te noemen. De Lancita serie is geschikt voor 12 cm potten en tevens voor 2 - 3 liter potten. Lancita kan zowel binnen als buiten geteeld worden.

Brunnera Little Heart

Een charmante en compacte variëteit met overvloedige, prachtig gevormde, zilverkleurige bladeren. Geschikt voor zowel binnen- als buitenteelt, past goed in 12 cm tot zelfs 3 liter potten. Deze prachtige Little Heart is ideaal voor landscaping en voorjaarsbloei in de tuin.

Wij zorgen er constant voor dat het uitgangsmateriaal schoon en in goede conditie is. Hiervoor gebruiken wij onze eigen ontwikkelde technologieën voor vermeerdering, acclimatisatie en voorbereiding van het jong plantmateriaal.

Voor het gemak en ontzorgen van onze klanten, bieden wij een aantal verschillende standaarden voor het uitgangsmateriaal aan. Dankzij de verschillende productielocaties in Polen, Nederland en Portugal, kunnen wij de meest optimale omstandigheden voor ons uitgangsmateriaal garanderen. Al bovengenoemde activiteiten hebben maar één doel: u voorzien van het kwalitatief beste materiaal voor een veilige, zorgeloze en vooral winstgevendende teelt.

Neemt u eens een kijkje op onze website www.vitroflora.com waar u het gehele actuele assortiment aantreft. Tevens kunt u op een gemakkelijke, intuïtieve manier de beschikbaarheid van de door u geselecteerde weken controleren en uw bestelling plaatsen via het gekoppelde online ordersysteem.

Wij hopen dat u, door volop gebruik te maken van ons assortiment, de volgende ambassadeur bent voor wie milieu en natuur belangrijk is. Samen dragen we zorg voor de schoonheid en rijkdom van de wereld om ons heen! Samen dragen we zorg voor de schoonheid en rijkdom van de wereld om ons heen!

Vitroflora & Alkemade Team

Sehr geehrte Damen und Herren,

auch in diesem Jahr freuen wir uns, Ihnen unseren neuen Katalog für Stauden und Gräsern aus dem Vitroflora und Alkemade Perennials Sortiment vorstellen zu können.

In den vergangenen Jahren haben wir uns zum Marktführer entwickelt und bieten heute das breiteste Sortiment an Stauden und Gräsern auf dem Markt an. Was unser umfangreiches Sortiment so einzigartig macht, ist die Tatsache, dass es sowohl den Bedürfnissen der Staudengärtner gerecht wird, die sich auf Landschaftsbau und Gartenarchitektur konzentrieren, als auch denen der Fachgärtner, die sich auf den visuellen Markt konzentrieren und große Einzelhandelsketten beliefern.

In unserem vielfältigen Sortiment finden Sie Sorten, die sich für das Eintopfen in größere Töpfe für den **visuellen Markt eignen (mit V gekennzeichnet)**, aber natürlich auch für den bekannten P9-Markt, für den **Landschaftsbau (mit L gekennzeichnet)**.

Dank der vielen Versuche und Tests, die wir an unseren eigenen Standorten in Polen, den Niederlanden, Deutschland und Portugal sowie bei vielen Kunden in ganz Europa durchgeführt haben, können wir die Eignung für beide Marktsegmente mit großer Sorgfalt bestimmen. Deshalb ist eine Sorte oft sowohl mit einem „V“ als auch mit einem „L“ gekennzeichnet.

Einige Highlights möchten wir Ihnen vorstellen.

Veronica Lancita

Eine schöne kompakte bis mittelgroße Veronica-Serie mit leuchtenden Farben und ausgezeichneter Resistenz gegen Mehltau und Rost. Die Serie Lancita zeichnet sich durch eine sehr gute Verzweigung und Gleichmäßigkeit aus, was ein großer Vorteil für den Gärtner und den Verbraucher ist. Die Serie zeichnet sich durch einen unkomplizierten Anbau aus und benötigt keine Wachstumsregulatoren. Die kurze Kulturzeit von ca. 8 bis 10 Wochen kann als schnell bezeichnet werden.

Die Lancita-Serie ist sowohl für 12 cm-Töpfe als auch für 2-3 Liter-Töpfe geeignet. Lancita kann sowohl im Haus als auch im Freiland kultiviert werden.

Brunnera Little Heart

Eine charmante und kompakte Sorte mit reichlich, schön geformten, silbrigen Blättern. Sie eignet sich sowohl für den Innen- als auch für den Außenanbau und passt gut in 12-cm- bis sogar 3-Liter-Töpfe. Diese schöne Little Heart ist ideal für die Landschaftsgestaltung und die Frühjahrsblüte im Garten.

Unser Labor zur Herstellung von In-vitro-Material ist als Elite Naktuinbouw zertifiziert, was bedeutet, dass wir die höchsten und strengsten Standards bei der Herstellung von Elitematerial erfüllen. Wir sorgen ständig dafür, dass das Ausgangsmaterial sauber und in gutem Zustand ist. Dazu verwenden wir selbst entwickelte Technologien für die Vermehrung, Akklimatisierung und Aufbereitung des Jungpflanzenmaterials.

Zur Optimierung des Komforts und der Nutzererfahrung unserer Kunden bieten wir eine Reihe verschiedener Standards für das Ausgangsmaterial an. Dank unserer Produktionsstandorte in Polen, den Niederlanden und Portugal können wir optimale Bedingungen für unser Ausgangsmaterial garantieren. All diese Aktivitäten haben nur ein Ziel: Ihnen das beste Qualitätsmaterial für einen sicheren, sorglosen und vor allem rentablen Anbau zu liefern.

Werfen Sie einen Blick auf unsere Website www.vitroflora.com, wo Sie das gesamte aktuelle Angebot finden. Sie können auch einfach und intuitiv die Verfügbarkeit der von Ihnen ausgewählten Wochen prüfen und Ihre Bestellung über das verlinkte Online-Bestellsystem aufgeben.

Wir hoffen, dass Sie durch die umfassende Nutzung unseres Angebots der nächste Botschafter sind, dem Umwelt und Natur wichtig sind. Gemeinsam kümmern wir uns um die Schönheit und den Reichtum der Welt um uns herum!

Vitroflora & Alkemade Team

Уважаемые дамы и господа!

С большим удовольствием представляем вам, наш новый каталог молодых растений многолетников и декоративных злаков из ассортимента компаний Vitroflora и Alkemade Perennials. В последние годы мы стали лидером рынка, предлагая самый широкий выбор многолетников и злаков.

Что делает наш ассортимент по-настоящему уникальным? Он отвечает потребностям как производителей, работающих в сфере ландшафтного дизайна и озеленения, так и специализированных питомников, ориентированных на оптовую или розничную торговлю. А также поставки в крупные торговые сети.

В нашем обширном ассортименте вы найдёте сорта, подходящие для выращивания в горшках для **внутреннего рынка (обозначены буквой V)**, а также сорта, предназначенные для известного сегмента P9, ориентированного на **ландшафтные проекты (обозначены L)**.

Благодаря множеству масштабных испытаний, проведённых на наших производственных площадках в Польше, Нидерландах, Германии и Португалии, а также у наших клиентов по всей Европе, мы с высокой точностью можем определить пригодность каждого сорта для того или иного сегмента. Поэтому многие сорта имеют двойную маркировку – V и L.

Позвольте представить вам некоторые из наших новинок:

Veronica Lancita

Красивая, компактная серия вероники с яркой окраской и отличной устойчивостью к мучнистой росе и ржавчине. Сорт Lancita хорошо кустится, быстро растёт и не требует применения регуляторов роста. Время подготовки от посадки до продажи, всего лишь 8-10 недель. Lancita подходит как для горшков d 12, так и для контейнеров объёмом 2-3 литра (C3)

Brunnera Little Heart

Очаровательный, компактный сорт с обильно красивой, серебристой листвой. Подходит для выращивания в горшках от d 12 до C3. Brunnera Little Heart — отличный выбор для озеленения и весеннего цветения.

Мы постоянно следим за тем, чтобы посадочный материал был чистым и находился в идеальном состоянии. Для этого мы используем собственные технологии размножения, акклиматизации и подготовки молодых растений.

Для удобства наших клиентов мы предлагаем различные стандарты посадочного материала. Благодаря производственным базам в Польше, Нидерландах и Португалии мы обеспечиваем оптимальные условия для выращивания. Все эти усилия направлены на достижение одной цели — предоставить вам материал самого высокого качества для быстрого и успешного выращивания.

Приглашаем вас посетить наш сайт: www.vitroflora.com, где представлен полный ассортимент. Вы легко и быстро сможете проверить наличие интересующих вас растений в нужные недели и оформить заказ через онлайн-систему.

Надеемся на то, что максимально используя наш ассортимент, вы станете ещё одним представителем, для которого важны природа и окружающая среда. Вместе мы заботимся о красоте и богатстве мира, который нас окружает!
